

Combine Anatomy

These are generalizations of combines and their parts. Not all combines will be the same as these illustrations.

Draper flex header

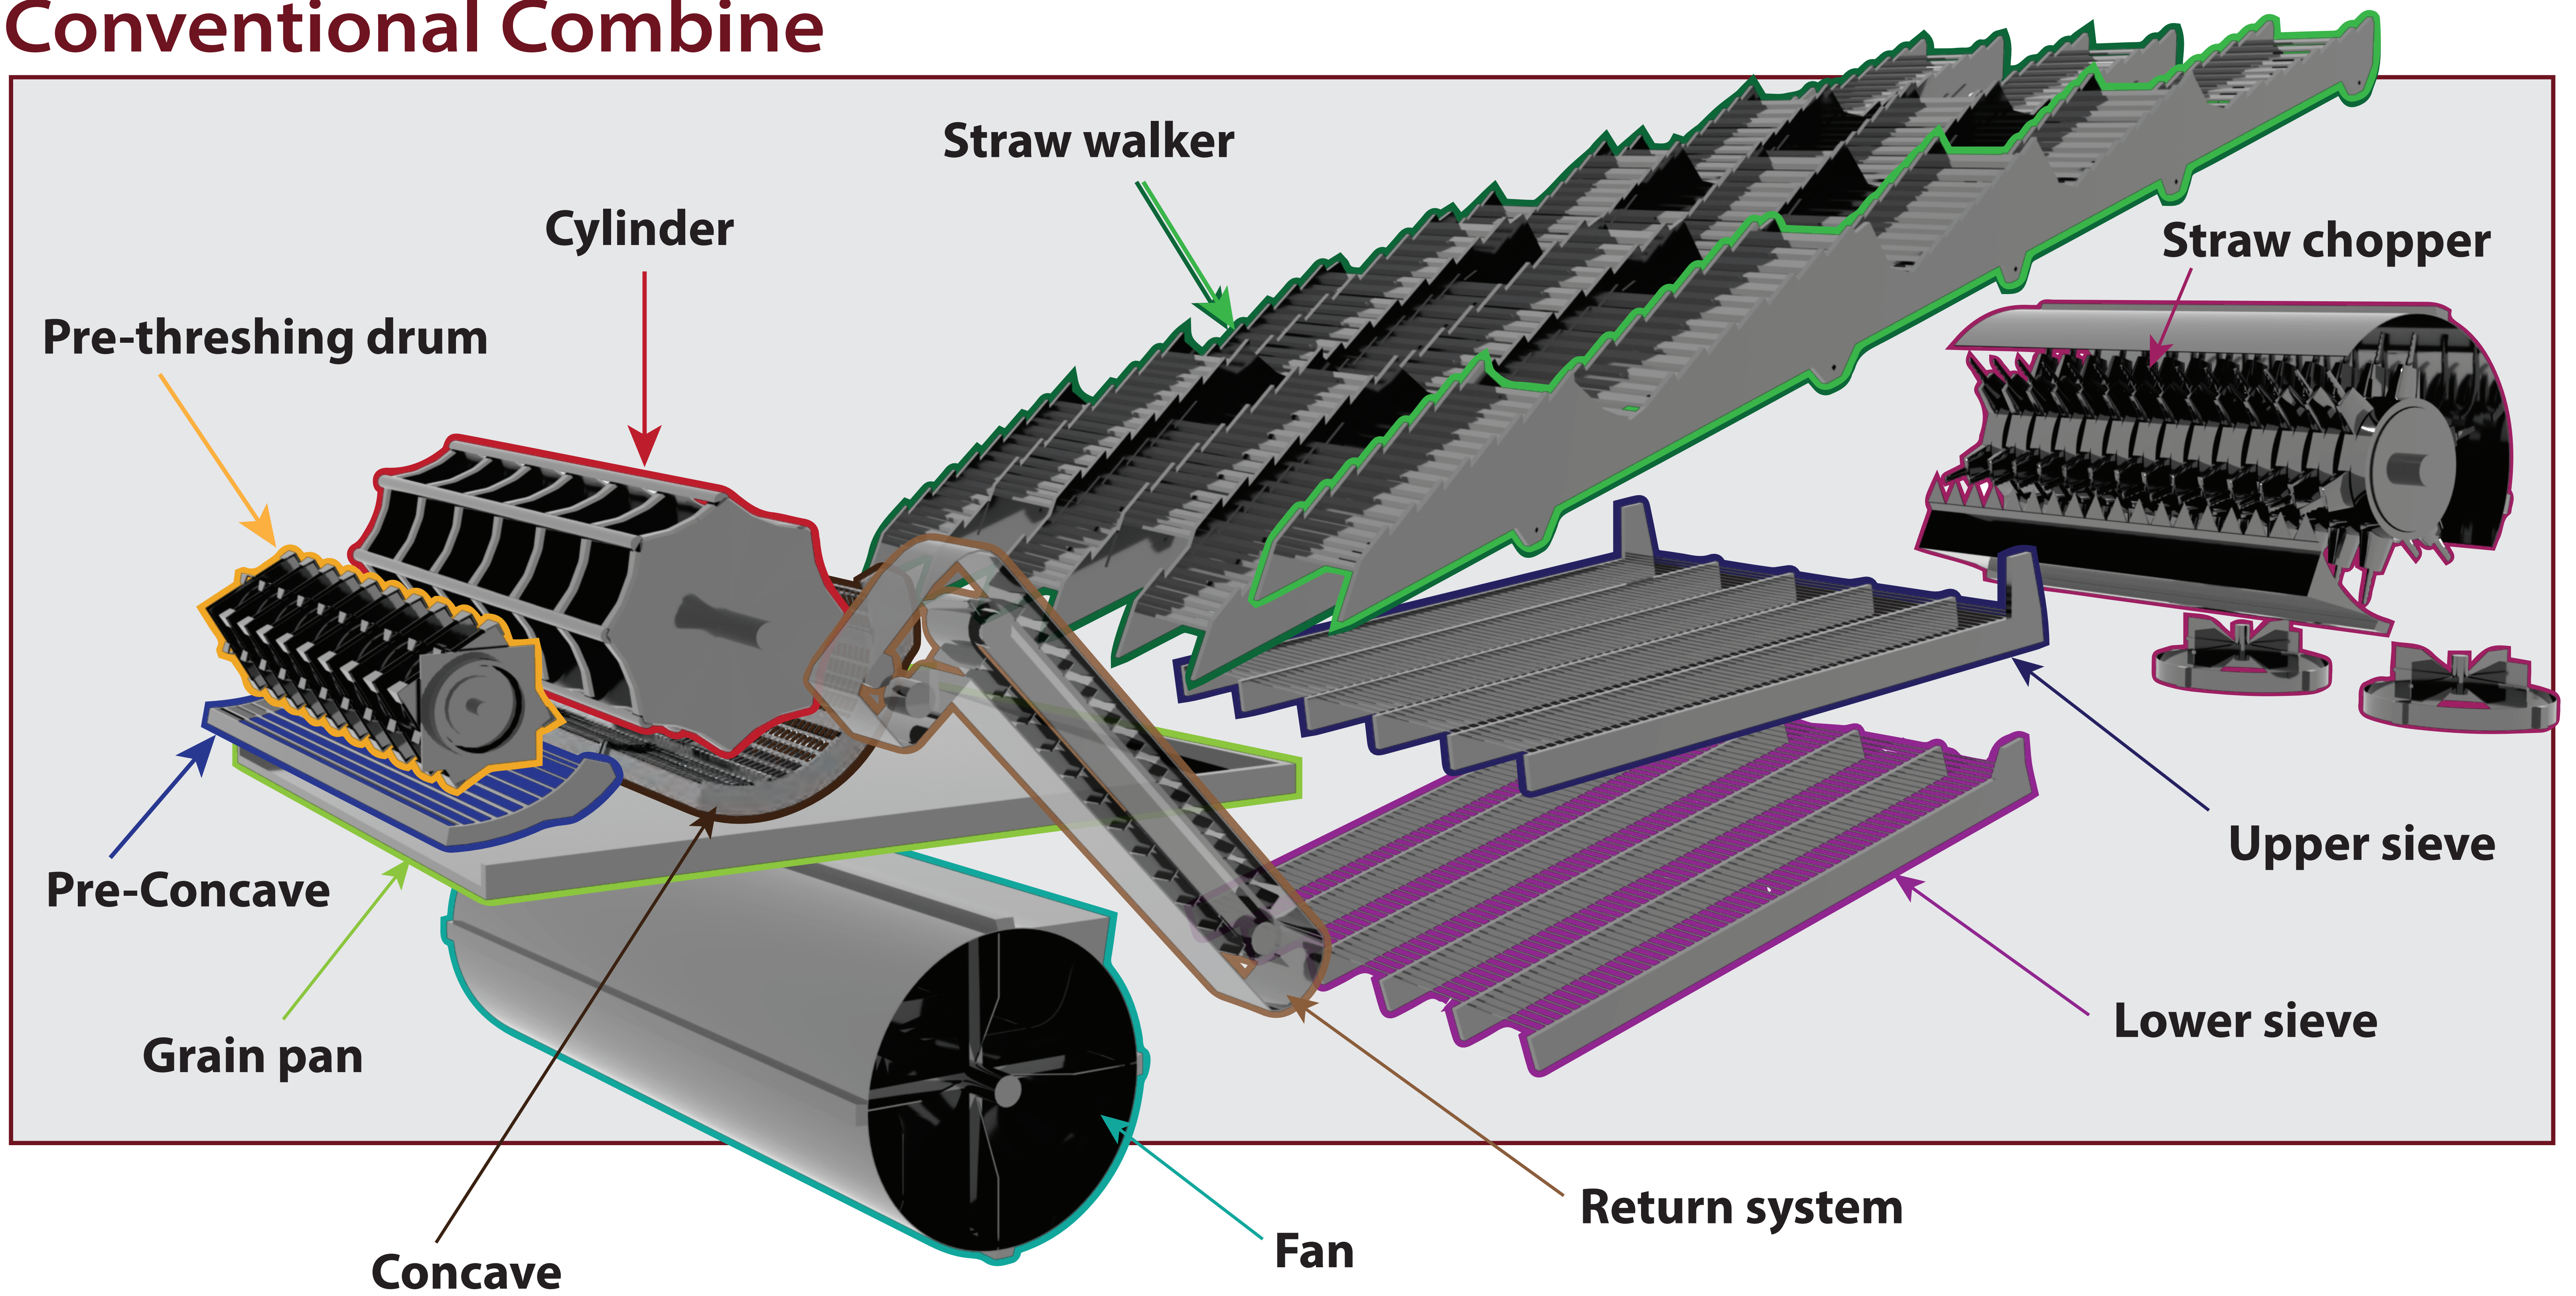

Auger flex header

Pickup header

The straw chopper can chop and spread residue or be repositioned to drop straw (for baling) or sampling.

Conventional Combine

Note: Many combines have a pre-sieve with a separate adjustment that may be adjusted in the back (even if the sieves can be adjusted in the cab). Keep this in mind when considering all combine adjustments which can limit harvest losses.

Rotary Combine
